REPLACING THE STYLUS

The stylus will lose its effectiveness and begin to damage records after about 400 hours of use. An ND-155G replacement stylus is available at your Sony dealer. Handle the stylus carefully as it is very delicate.

Be sure to turn off the POWER switch before replacing the stylus. Secure the tonearm to the arm rest, detach the stylus assembly by grasping it between the thumb and forefinger then insert the new stylus.

REPAIRING PRECAUTION

[To supply B+ voltage]

The power of this unit is fed from HST-550W or 750 W. Because of this, connect the regulated power supply as illustrated right when this unit alone operates.

LOCATION AND FUNCTION OF CONTROLS

TURNTABLE ASSEMBLY

Hook the belt on the motor pulley.

If the belt is removed from the platter, replace it with the glossy side outward.

Speed Adjustment

Note: Be sure to perform 45rpm adjustment before 33 rpm.

1. Place a stroboscope board on the turntable sheet.
2. Set the SPEED switch to 45.

Press the START button.

Adjust RV2 so that the stripped pattern of stroboscope board is stationary.

3. Set the SPEED switch to 33.

Adjust RV1 in the same way.

Stylus Drop-point Adjustment

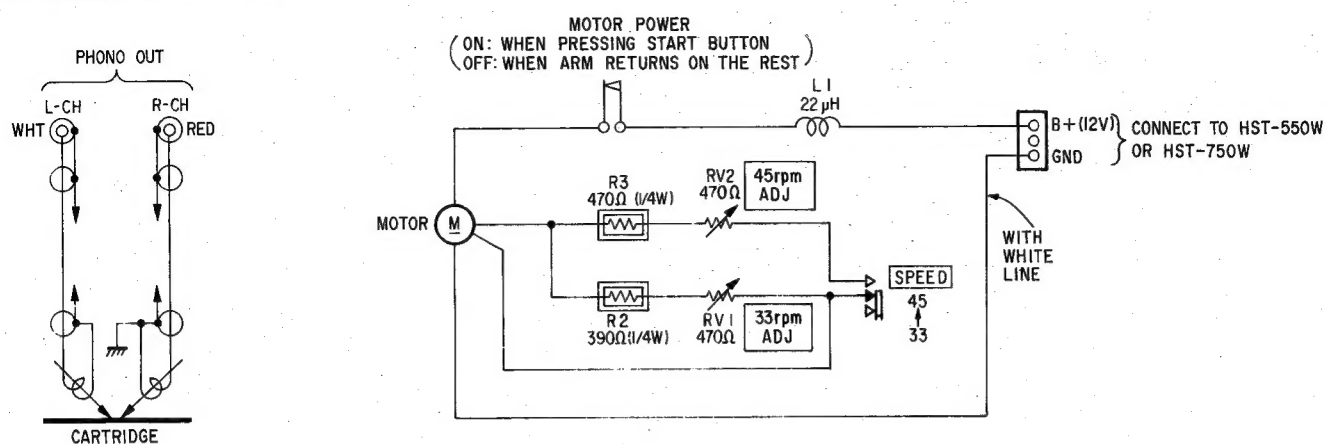

1. Place a test record (YFSC-16) on the turntable sheet.
2. Set the SPEED switch to 33.
3. Press the START button.
4. By using a screwdriver, turn the adjustment screw so that the stylus tip drops on the record at the 7-17 counts position.
5. Move the arm to return detecting groove and confirm that the auto-return operation is started normally.

Note: The proper adjustment for a 30cm record is also correct for a 17cm record.

When turning adjustment screw, put the arm on the arm rest.
